

Equipment on the move

We have been very busy lately in the warehouse getting supplies ready to ship to Vanuatu upon receiving the governmental approval to ship materials and supplies for the Vanuatu Water Project without import tax.

This is an enormous milestone as we have many expensive items (excavator, skid loader, UTVs) to ship for the project and the import taxes would have almost doubled the cost.

Along with the new equipment being shipped is the big green Vanuatu truck! It is scheduled to be loaded on the flat rack on March 1st – next stop, the South Pacific!

Ministry update

February 2024

Donleys on the move

Our next trip is scheduled for the first half of April 2024. We will be trying to get to the ranch in Vanuatu and do the repairs that we planned to do last October.

The team includes 10 individuals with varying levels of mechanical skills.

Reba is going along again to help with this work as well as exploring possible ministry opportunities for FIA in Vanuatu. We appreciate your prayers for us as we prepare for this trip but also as we seek what opportunities God might have for us in Vanuatu or at a different FIA project.

Praise God for the anonymous donor who covered the cost of this trip for us!

2024 Mechanic Projects

We should soon have the Dock Crane running. The Crane will be used to transform the Big Blue Box truck into a shop truck to be sent to Vanuatu for the Water Project. Once the heavy equipment gets up into the mountain, it will be easier to take the shop to the equipment than to bring broken equipment back to the shop for repairs.

Family Ties

We saw our oldest son get married in September. Congratulations to Robert and Julia!

We got to visit Richard & Reina in Colorado in October!
